

To Whom it may Concern,

I as a truck driver have subscribed to XM Radio for the convenience of the XM, because there is no other way for me to be able to get all the information on the world news any other way. I travel through New York, Baltimore, and D.C. twice a day, five days a week, and my ability to tune into the XM travel and weather channels have helped tremendously. Now I know when there is a delay due to an accident or just plain rush hour, I am able to plan another route so that my deliveries will be on time. I pay for these services and do not believe that the NAB should have anything to do with them.
